Getting started

superfar keeps two panes open, each with its own tabs,
path bar and status line. The active pane is unmistakable.
Function keys do the work: F5 copies, F6 moves, F7 makes a
folder and F8 sends to the trash. Hold Shift, Ctrl or Alt
and the bar at the bottom relabels itself.
Nothing pops up. Progress, conflicts and questions appear
inside the window, where the keyboard already is.

Working with panes

superfar keeps two panes open, each with its own tabs,
path bar and status line. The active pane is unmistakable.
Function keys do the work: F5 copies, F6 moves, F7 makes a
folder and F8 sends to the trash. Hold Shift, Ctrl or Alt
and the bar at the bottom relabels itself.
Nothing pops up. Progress, conflicts and questions appear
inside the window, where the keyboard already is.

Keys and the function bar

superfar keeps two panes open, each with its own tabs,
path bar and status line. The active pane is unmistakable.
Function keys do the work: F5 copies, F6 moves, F7 makes a
folder and F8 sends to the trash. Hold Shift, Ctrl or Alt
and the bar at the bottom relabels itself.
Nothing pops up. Progress, conflicts and questions appear
inside the window, where the keyboard already is.
